

Jake McMahon

Business Development & Data Partnerships — freelance B2B, remote

jake@productquant.dev · linkedin.com/in/jake-mcmahon-product-ai · jakemcmahon.xyz · based in Tbilisi · covers Asia, Europe, MENA & US time zones; sells into APAC too

SUMMARY

Business development and partnerships lead who has personally sold, closed, delivered, and re-signed complex B2B deals — from \$100K/year to \$100K/month — and built the outbound lead machinery to source and qualify prospects at scale. Fluent in AI, data, and the regulatory environments around both. Looking to build the data-partnerships function at Toloka from zero.

THE SELLING RECORD

Queue — Head of Product Marketing & AI (product + agency, backed by Sarona Ventures) 2022 – present

- Sold and closed B2B deals as part of the core team — **monday.com, Guardio (1.5M+ users), CirclesUp, 8fig, thirdweb, NewDayUSA** — from **\$100K/year to \$100K/month**.
- Worked end-to-end: sales, product (built the product being sold in real time), delivery, and customer success.
- Re-signed monday.com multiple times**, expanded into the monday dev GTM launch, and held the account through multiple POC changes and internal team reshuffles.
- Sold to every decision structure — **single founders, multi-layered committees, flat boards** — adapting the pitch to whoever holds the pen.
- Personally sold and closed most deals at **\$15K–\$30K**; largest broader-team deal **\$100K/month**.
- Shipped custom AI products for monday.com, 8fig and Guardio; demand generation at **~300% ROI** (1.63% CTR, 8.7% conversion).

Flow (theuserflow.co) — Growth & Sales

2024 – present

- Personally sold and closed **\$16K–\$35K engagements** end-to-end: offer, decks, calls, close, delivery, customer success. Clients include FormDR, Scale Insights and DialMyCalls.

OUTBOUND MACHINERY (THE FUNCTION TOLOKA IS HIRING FOR)

- Built my own lead pipeline (list building, qualification, verification, email validation) wired to APIs — **monid, treg, AI Ark, BounceBan, maps data, residential proxies** — for lead lists at scale.
- Cold outbound at volume: **ListKit or custom builds plus LinkedIn outbound automation** to reach tens of thousands of prospects per month.
- Set up the delivery stack end to end — **cold-email infrastructure, domain warm-up, sending-campaign management**, cold-calling (Zadarma) — so campaigns land in inboxes, not spam.
- Negotiation range: one-call SMB owners through mid-market executives with legal and procurement — the full range a data-partnerships role requires.
- Build sales/pitch decks; negotiate, draft and finalize contracts — incl. investor marketing for European and MENA investors, and M&A marketing.

AI / DATA / REGULATORY FLUENCY

- Master's in Big Data & Business Analytics** — working knowledge of ML and computer vision and the tooling behind CV/robotics data pipelines (Python, SQL, NLP, scikit-learn, SageMaker, PySpark).
- Own a slice of **Tasq AI GTM (AEO / GEO / SEO)** — fluent in the regulatory environments around AI and data, how a company's data becomes useful (including to itself), and **robotics / physical AI** — Toloka's solution space.
- Ran a 90-day AI-search programme across four brands (Tasq, CYE, Spikerz, Willow): 96 published pieces, a 197-rule quality system, and a move from **0-of-57** buyer questions citing the brand to **#1 rankings**.
- Built an **NLP pipeline analysing 100K support tickets**; A/B-tested ads for a fintech startup (landed on Facebook by a wide margin).
- Short collaboration with **Pace Pricing**: pricing-tier architecture based on JTBD and product usage, aimed at raising CLV.

SUPPORTING PROOF

- HackingHR** — Head of Growth & Interim CTO: LinkedIn 800K → **1M+**; email opens **18%** → **35–50%**; AWS –30%, churn –30%; \$300K sponsorship; founder will vouch.
- FormDR** — healthcare SaaS (HIPAA): JTBD measurement; PostHog; Chameleon churn/onboarding; Customer.io flows; 20+ competitor teardown; roadmap from 60 recorded sales calls.
- Net Atelier** — investor-side rescue: after prior developers deleted the codebase at the end of runway, directed the team to a compelling MVP that **soft-launched with a competitive feature set**; board GTM deck, 30 claims checked (6 corrected), financial model within **8%** of industry benchmarks.
- Scale Insights** — Amplitude analytics; code-generated dashboards (2,100 lines, 39 charts); nine statistical tests, nulls included.
- Timelines AI** — analytics framework; A/B-tested changes credited with a **six-figure revenue lift**, proven statistically with Python.

EDUCATION

- MSc, Big Data & Business Analytics** — Saint Petersburg State University, GSOM (2020–2024). Thesis: payment-propensity prediction, **0.92 AUC on 1M+ records**.
- BSc, Behavioral Psychology** — Swinburne University of Technology (2013–2018).

LANGUAGES & FOOTPRINT

English native · Russian B2 · based in Tbilisi · covers Asia, Europe, MENA & US time zones (sells into APAC too) · remote across AU, AM, GE, BG, IL, TR, RO, MD.

Worked with teams across Asia, North America, Europe, MENA and LATAM · travelled across these regions plus Australia and New Zealand.
