

Jake McMahon

BUSINESS DEVELOPMENT & DATA PARTNERSHIPS · FREELANCE B2B · REMOTE

LINKEDIN.COM/IN/JAKE-MCMAHON-PRODUCT-AI · BASED IN TBILISI · ASIA, EUROPE, MENA & US TIME ZONES

SUMMARY

Closes unfamiliar B2B offers and builds the acquisition motion around them. Personally sells **\$16K-\$35K** engagements, has worked in the core team on deals from **\$100K/year to \$100K/month**, and can make an AI, data or regulated-product proposition clear to an operator who has not bought or sold it before. Applying that commercial motion to data partnerships.

EXPERIENCE

Head of Product Marketing & AI · *Queue (product + agency, venture-backed)* 2022-2025

- **Re-signed monday.com multiple times**, expanded into its developer-platform launch, and held the account through point-of-contact changes and internal reshuffles, turning it into a durable, growing client rather than a one-off win. Other clients: Guardio (1.5M+ users), CirclesUp, 8fig, thirdweb, NewDayUSA.
- **Built and sold AI products**: AI voice interviews that turn experts into thought-leadership content, and a LinkedIn audience-growth product (with venture studio 25 Madison), then carried the promise through delivery and customer success.
- **Personally sold and closed most \$15K-\$30K engagements**, and worked in the core team on the broader \$100K/month deal. Ran product and sales on the product side, the content team on the agency side.

Growth & Sales · *Flow (theuserflow.co)* 2025-2026

- **Turned an initial commercial conversation into signed, delivered work** in a two-to-three-person team and personally sold and closed \$16K-\$35K engagements from offer through delivery and customer success, adapting the case from a one-call founder to a committee or board and carrying it through legal and procurement.
- **FormDR** (healthcare, HIPAA): rebuilt measurement around buyer and user progress, not button clicks, so sales, customer success and product worked from the same picture; 60 recorded sales calls ranked the roadmap; kept protected health information out of the event stream. Built a churn-prevention and win-back system covering onboarding, churn and downgrade flows.
- **Scale Insights** (Amazon-PPC SaaS): diagnosed activation friction from analytics data and customer interviews, corrected funnel over-counting, and redesigned onboarding around the real blockers.
- **DialMyCalls** (mass notifications): built the company's first behavioural baseline from data it already owned, and smoothed onboarding for new users starting out on SMS sending within US business-texting rules.
- **Timelines AI**: made core-integration changes measurable; A/B-tested integration changes that the client credited with a six-figure revenue lift.

OUTBOUND MACHINERY

- **Built list qualification, validation and deliverability systems** (company-intelligence and contact-verification data, email-validation tooling, and maps-based prospect data) so outreach lands in inboxes, not spam.
- **Convert a target market into live conversations at scale** with list-building and LinkedIn outbound automation, warmed domains, campaign management and cold calling.
- **Carry a commercial case through to signature**: sales decks, negotiation, contract drafting and finalization, including investor and M&A marketing for European and MENA clients.

EXPERIENCE

Head of Growth & Interim CTO · *HackingHR*

2025

- **Took a top-five community to the #1 fastest-growing HR community on LinkedIn:** 800K to 1M+ followers, email opens 18% to 35-50%, a redesigned course platform, and \$300K in sponsorship revenue.
- **Rebuilt the operating backbone beneath the growth:** modernized the stack, backend and AI infrastructure for stability and uptime, cut AWS spend 30% while improving reliability, and cut churn 30% with a ranked model. Founder Enrique will vouch.

Investor-side Product & GTM Advisory · *Net Atelier*

2024-2026

- **Turned a deleted-codebase, end-of-runway rescue into a soft-launched MVP** with a competitive feature set, and gave investors a defensible route forward: GTM strategy and competitor teardown, with a three-scenario financial model that landed within 8% of industry benchmarks.

SELECTED PRIOR TRANSFORMATION EXPERIENCE

Investor Relations & Marketing Lead · *Magdalena Reith & LION Private Equity Partners, Munich*

DEC 2021 - NOV 2022

- **Turned complex financial information into narratives investors could act on,** helping startups raise from seed to Series A+. Authored investor letters for M&A and energy-project mezzanine financing, investor updates, and 70-100-page international briefs trusted by government and M&A firms.

Head of Digital Marketing & Technological Transformation · *Routleys, Launceston*

2019-2021

- **Modernized a 100+ year-old retailer without stopping trade or laying anyone off,** delivering 20% revenue growth while a 30-person team retrained in step with the migration to new ERP, inventory and CRM systems on AWS.

AI, DATA & REGULATORY FLUENCY

- **I run GTM and AI-search content for Tasq AI,** a physical-AI and robotics-data company, shipping research-backed pieces on robot training-data pipelines and edge cases, including robot-specific failure modes.
- **Working knowledge of ML and computer-vision/robotics pipelines** from an MSc in Big Data & Business Analytics, enough to explain the business use, data flow and constraints of a data partnership clearly.
- **Ran AI-search visibility for four client brands,** from a measured baseline where none of 57 buyer questions returned the brand, to three client articles now ranking #1.

EDUCATION

MSc, Big Data & Business Analytics · Saint Petersburg State University, Graduate School of Management, 2020-2024. Thesis: a payment-propensity system for a mobile-payments app, with four algorithms benchmarked and **0.92 AUC (a predictive-accuracy score) on 1M+ records.**

BSc, Behavioral Psychology · Swinburne University of Technology, 2013-2018.

LANGUAGES & FOOTPRINT

English native · Russian B2 · based in Tbilisi · works across Asia, Europe, MENA and US time zones. Remote track record across Australia, Armenia, Georgia, Bulgaria, Israel, Turkey, Romania and Moldova.
